CONTENTS OF VOLUME 40

PART 1 (March 1984)

Simplified models of screening for chronic disease: Estimation procedures from mass screening programmes . . . . . N. E. Day and S. D. Walter 1
The detection of disease clustering in time . . . . . T. Tango 15
Calculation of carcinogenic potency from long-term animal carcinogenesis experiments
C. Sawyer, R. Peto, L. Bernstein and M. C. Pike 27
Nonparametric estimation of the distribution of time to onset for specific diseases in survival/sacrifice experiments . . . . . B. W. Turnball and T. J. Mitchell 41
Additive and multiplicative models for relative survival rates . . . . . J. D. Buckley 51
Biased selection of controls for case–control analyses of cohort studies . . . . . J. H. Lubin and M. H. Gail 63
A model for the synthesis of chemical compounds in red blood cells with an application to diabetes
M. L. Deaton, J. J. Higgins and J. E. Smith 77
Flow distribution in closed networks: Minimal sets of measuring sites . . . . . T. Wetter and R. Repges 85
A procedure for model search in multidimensional contingency tables . . . . . T. Havránek 95
First-order Markov chains with a zero diagonal transition matrix . . . . . P. de Jong and M. Greig 101
Multistage estimation compared with fixed-sample-size estimation of the negative binomial parameter k
L. J. Willson, J. L. Folks and J. H. Young 109
Nonparametric estimation of species richness . . . . . E. P. Smith and G. van Belle 119
Assessing competition among skewed distributions of plant biomass: An application of the jackknife
S. S. Higgins, R. B. Bendel and R. N. Mack 131
Fitting generalized allometric models to multivariate growth data . . . . . D. Griffiths and R. Sandland 139
A likelihood ratio test for a patterned covariance matrix in a multivariate growth-curve model
V. M. Chinchilli and W. H. Carter, Jr 151
Covariances of relatives stemming from a population undergoing mixed self and random mating
C. C. Cockerham and B. S. Weir 157
Methods for the identification of Lexian, Poisson and Markovian variations in the secondary sex ratio
R. Crouchley, R. B. Davies and A. R. Pickles 165
Log-linear-model analysis of the association between disease and genotype
H. J. Khamis and K. Hinkelmann 177
Log-linear models for linked loci . . . . . M. Haber 189
Shorter Communications
On the random pairs method of density estimation . . . . . G. Clayton 199
A critical reappraisal of the patch-gap model . . . . . R. G. Jarrett and B. J. T. Morgan 203
Kendall's tau with a blocking variable . . . . . E. L. Korn 209
Designs for the addition of six further treatments to Latin squares of order six . . . . . J. W. Hall 215
Three-period crossover designs for two treatments . . . . . A. F. Ebbutt 219
On testing for bioequivalence . . . . . D. M. Rocke 225
The Consultant's Forum
Experimenting with intercrops . . . . . S. C. Pearce and R. N. Edmondson 231
Quick and simple approximation of sample sizes for comparing two independent binomial distributions: Different-sample-size case . . . . . Y. J. Lee 239
Query: The interpretation of provenance tests . . . . . E. R. Falkenhager 243
Response . . . . . W. G. Warren 244
. . . . . G. H. Freeman 246
Reader Reaction: Extended moment series and the parameters of the negative binomial distribution
K. O. Bowman 249
Obituary: Edilberto da Costa Amaral 253
Correspondence 255
Abstracts 259
Book Reviews 277
The Biometric Society 291
News and Announcements 293

PART 2 (June 1984)

Fitting a sinusoid to biological rhythm data using ranks . . . . . A. N. Petitt 295
A method for estimating incidence rates of onchocerciasis from skin-snip biopsies with consideration of false negatives . . . . . T. Yanagawa, F. Kasagi and T. Yoshimura 301
Modelling the migration of *Onchocerca volvulus* in simuliids, using a simple compartmental process
D. Jerwood, T. Lewis and W. O. Saporu 313

Bayesian estimation of the number of species ..... W. A. Lewins and D. N. Joanes 323
The use of auxiliary variables in capture-recapture and removal experiments
K. H. Pollock, J. E Hines and J. D. Nichols 329
The distributions of *N* and *F*: Measures of HLA haplotype concordance ..... J. Green and H. C. Low 341
Testing the effect of sex differences on sib-sib correlations ..... A. Donner, J. J. Koval and S. Bull 349
Inbreeding under selection from unrelated families ..... P. M. Burrows 357
Estimating parameters of the family-size distribution in ascertainment sampling schemes: Numerical results ..... W. J. Ewens and B. Asaba 367
Progency testing for all-or-none traits when a multifactorial model applies ..... R. N. Curnow 375
Plan mixte equilibré à deux facteurs hiérarchiques pour les données binaires ..... S. Im 383
A mixed model procedure for analyzing ordered categorical data ..... D. A. Harville and R. W. Mee 393
Treatment allocation for nonlinear models in clinical trials: The logistic model
C. B. Begg and L. A. Kalish 409
Small-sample bias of point estimators of the odds ratio from matched sets ..... N. P. Jewell 421
Difficulties with regression analyses of age-adjusted rates ..... P. R. Rosenbaum and D. B. Rubin 437
On the use of case series to identify disease risk factors
R. L. Prentice, W. M. Vollmer and J. D. Kalbfleisch 445
Covariate analysis of competing-risks data with log-linear models ..... M. G. Larson 459
A Monte Carlo comparison of maximum likelihood and minimum chi square sampling distributions in logit analysis ..... K. C. Smith, N. E. Savin and J. L. Robertson 471
Shorter Communications
A simple test for goodness of fit of Cox's proportional hazards model
N. J. D. Nagelkerke, J. Oosting and A. A. M. Hart 483
Linear rank procedures on litter-matched data ..... J. E. Michalek and D. Mihalko 487
Approximate case influence for the proportional hazards regression model with censored data
K. C. Cain and N. T. Lange 493
An irreversible two-compartment model with age-dependent turnover rates
T. H. Hughes and J. H. Matis 501
Variance components estimators for the balanced two-way mixed model
K. R. Lee and C. H. Kapadia 507
Confidence intervals for the ratio of two binomial proportions ..... P. A. R. Koopman 513
The Consultant's Forum
Biometry in the Third World: Science not ritual ..... D. A. Preece 519
Some opportunities for biometry in promoting child health in the Third World
S. B. J. MacFarlane 525
Optimization using stochastic approximation and Monte Carlo simulation (with application to harvesting of Atlantic menhaden) ..... D. Ruppert, R. L. Reish, R. B. Deriso and R. J. Carroll 535
Some statistical methodology for the analysis of HLA data ..... V. T. Farewell and S. Dahlberg 547
Correspondence 561
Book Reviews 565

PART 3 (September 1984)

Stopping rules for clinical trials incorporating clinical opinion
L. S. Freedman, D. Lowe and P. Macaskill 575
A comparison of reflected versus test-based confidence intervals for the median survival time, based on censored data ..... E. V. Slud, D. P. Byar and S. B. Green 587
Confidence intervals for the survival function using Cox's proportional-hazard model with covariates
C. L. Link 601
Path analysis of family resemblance and gene–environment interaction
G. M. Lathrop, J. M. Lalouel and A. Jacquard 611
Efficiencies of experimental designs for an illness–death model .... Ø. Borgan, K. Liestøl and P. Ebbesen 627
Data analytic methods for matched case–control studies ..... D. Pregibon 639
HLA and disease: Relative-risk regression methods and multiple testing considerations
R. L. Prentice, R. Storb, K. S. Brown and M. W. Mason 653
The application of a sequential procedure with elimination as a method for the screening for metabolic diseases ..... J. C. Geertsema and C. J. Reinecke 663
Selecting a screening cut-off point or diagnostic criterion for comparing prevalences to disease
C. Brownie and J.-P. Habicht 675
Principal components, factor analysis, and multivariate allometry: A small-sample direction test
P. Jolicoeur 685
Curve fitting for repeated measurements made at irregular time-points ..... S. L. Hui 691
A growth-curve model approach to multivariate quantal bioassay ..... E. M. Carter and J. J. Hubert 699
Diet dissimilarity ..... F. L. Ramsey and C. P. Marsh 707
Competition experiments for light in a plant monoculture: An analysis based on two-dimensional spectra
E. Renshaw 717
The association between pairs of species on discrete habitable units ..... S. Engen 729

A general methodology for maximum likelihood inference from band-recovery data
M. J. Conroy and B. K. Williams 739
Obtaining confidence limits on parameters of the Jolly–Seber model for capture–recapture data
B. F. J. Manly 749
On Mead's test for pattern . . . . . G. J. G. Upton 759
Investigating group-specific clustering in univariate spatial data with many small groups . . . . T. Schweder 767
Estimation in a bidirectional mixture of von Mises distributions . . . . . R. Bartels 777
Shorter Communications
On the performance of a likelihood ratio test for genetic linkage
E. V. Nordheim, D. M. O'Malley and S.-C. Chow 785
Two-stage clinical trial stopping rules . . . . . J. D. Elashoff and T. J. Reedy 791
Exact confidence intervals following a group sequential test
A. A. Tsiatis, G. L. Rosner and C. R. Mehta 797
Estimating the variance of empirical logits and contrasts in empirical log probabilities . . E. J. Bedrick 805
Monte Carlo confidence intervals . . . . . S. T. Buckland 811
Exact significance testing to establish treatment equivalence with ordered categorical data
C. R. Mehta, N. R. Patel and A. A. Tsiatis 819
The Consultant's Forum
Cutting edges in biometry . . . . . W. T. Federer 827
The status of biometry in agricultural research inthe CARICOM region . . . . . F. B. Lauckner 841
Temperature-based estimation for the time of death in white-tailed deer
J. M. Kienzler, P. F. Dahm, W. A. Fuller and A. F. Ritter 849
An improved method for measuring heart-rate variability: Assessment of cardiac autonomic function
C. R. Weinberg and M. A. Pfeifer 855
Correspondence 863
Abstracts 865
Book Reviews 869

PART 4 (December 1984)

Spatial pattern detection using quadrat samples . . . . . J. F. Heltshe and T. A. Ritchey 877
A score test for the possible presence of recessive alleles in generalized ABO-like genetic systems
J. J. Gart and J.-M. Nam 887
Inbreeding under selection from related families . . . . . P. M. Burrows 895
Interval estimation of the density of organisms using a serial-dilution experiment
M. W. Loyer and M. A. Hamilton 907
A model for the growth pattern of muttonbirds . . . . . J. D. Henstridge and R. L. Tweedie 917
A biological marker model for predicting disease transitions
J. P. Klein, J. H. Klotz and M. R. Grever 927
On the statistical estimation of speech-organization distributions from aphasia data
R. L. Carter, P. Satz and M. Hohenegger 937
Estimating fetal age by ultrasound measurements: an example of multivariate calibration
S. D. Oman and Y. Wax 947
Random effects models for serial observations with binary response
R. Stiratelli, N. Laird and J. H. Ware 961
General observer-agreement measures on individual subjects and groups of subjects
D. L. O'Connell and A. J. Dobson 973
Robust comparison of two regression lines and biomedical applications
N. J. Hill and A. R. Padmanabham 985
Power and sample size for a collection of 2×2 tables . . . . . A. Muñoz and B. Rosner 995
Asymptotic and exact power for the McNemar test and its analogue with R controls per case
S. W. Duffy 1005
Tests of the null hypothesis in case–control studies
E. D. Lustbader, S. H. Moolgavkar and D. J. Venzon 1017
Multivariate methods in ophthalmology with application to other paired-data situations . . . . . B. Rosner 1025
Properties of proportional-hazards score tests under misspecified regression models
S. W. Lagakos and D. A. Schoenfeld 1037
A two-sample censored-data rank test for acceleration . . . . . N. E. Breslow, L. Edler and J. Berger 1049
Change-over clinical trial with binary data: Mixed-model-based comparison of tests . . . . . V. Fidler 1063
The desirability of adjusting for residual effects in a crossover design
S. Abeyasekera and R. N. Curnow 1071
Procedures for comparing samples with multiple endpoints . . . . . P. C. O'Brien 1079
Shorter Communications
A cautionary example on the use of second-order methods for analyzing point patterns
A. J. Baddeley and B. W. Silverman 1089
On the apparent clustering of clonal albumin production and enzyme activity levels
H. T. Thaler and H. I. Braun 1095

On Bayesian methods for bioequivalence ..... M. R. Selwyn and N. R. Hall 1103
Assessing differential drug effect ..... D. A. Berry, M. L. Eaton, B. P. Ekholm and T. L. Fox 1109
A comparative study of conditional maximum likelihood estimation of a common odds ratio
W. W. Hauck 1117
Confidence interval about the response at the stationary point of a response surface, with an application to preclinical cancer therapy
W. H. Carter, Jr, V. M. Chinchilli, E. D. Campbell and G. L. Wampler 1125
Classification on the basis of successive observations ..... K. Ulm 1131
A note on the estimation of the mean intensity of insect infestation
E. Oakenfull, I. Salbe and B. Zehnwirth 1137
On line-transect estimators for population density, based on elliptic flushing curves
A. Otten and P. G. de Vries 1145
The Consultant's Forum
Nonparametric estimation of the survival function when cause of death is uncertain
A. H. Racine-Poon and D. G. Hoel 1151
Reader Reaction: Models for rates with Poisson errors ..... J. A. Nelder 1159
Response ..... E. L. Frome 1160
An Obituary Appreciation: Jerzy Neyman ..... P. S. Puri 1163
Obituary: Edward Walter 1169
